Breaking News

[The new solution norma™ CRC Enabler is now available](#)

Audaxys offers the new solution **norma™** CRC Enabler that was developed to help financial institutions in the compliance process with the latest regulations from Bank of Portugal regarding the Centralization of Credit Responsibilities

norma™ CRC Enabler is provided to our customers, under the maintenance contracts of our products. The entities not using our solutions or not having maintenance contracts, may have access to the features available in the **norma™** CRC Enabler through its acquisition and integration.

[2008 audaxys Client Conference](#)

It took place in the past 30 May in Quinta da Romeira in the outskirts of Lisbon, another Audaxys annual event, **2008 audaxys Client Conference**.

In the event, organized for customers, partners and Financial Services Institutions, current financial issues were raised by our partners, both in business and in technical terms, including the debt recovery and collection issue, systems and channels integration or the new hardware paradigms.

In closing Audaxys presented the strategic lines for the future development of its products. The event also served as a pretext for a pleasant social living and ended with an excellent wine proof.

[audaxys present at IBM Software Live 08](#)

Audaxys is present at the IBM Software Live08 event which runs in Lisbon on November 6, where will present the latest **norma™** version, a management software for Specialized Financing Institutions, and CollectionsNET™ a solution to support the collections and credit recovery process in entities of all activity sectors.
